

Resolution

The European Council commissions the existing EU Privacy Protection Group to organise the procedure of having a Lead European Data Protection Authority for consultation and communication with the Group and LCI. The benefit will be a future harmonised procedure for the transfer of personal membership data valid in every country of the Europaforum.

Further, the European Council commissions the EU Privacy Protection Group to conduct a study, open to active participation of LCI, on a European standardised membership management system. The system must be designed as a European project under European law. The system in question must ensure that the exchange of information with Lions Clubs International Headquarters at all times complies with the general EU data protection regulation. The result of the study shall be presented during the Europa Forum 2019 in Tallin for further considerations.

"provided that:"

1. The conduct of such investigation shall have no financial cost or implication for any Multiple District, Sub-District, Single District or undistricted area within the Europa Forum, and
2. there is no obligation, expressed or implied, on any Multiple District, Sub-District, Single District or undistricted area within the Europa Forum to adopt the recommendations of such investigation, nor to contribute to any costs incurred by the adoption of all or any such recommendations.
